FOOT & ANKLE REFERRAL AT A GLANCE

Comprehensive Foot & Ankle Medicine and Surgery

Consider Early Podiatric Evaluation

Patients may benefit from podiatric evaluation for:

- Persistent foot or ankle pain
- Heel pain that is not improving
- Sports injuries or recurrent ankle sprains
- Suspected stress fractures
- Tendon or overuse injuries
- Foot or ankle deformity
- Progressive bunions or hammertoes
- Difficulty walking
- Biomechanical concerns
- Questions about orthotics or footwear
- Diabetes with foot complications, neuropathy, ulceration, infection, or Charcot changes
- Foot ulcers or infections
- Other unexplained or persistent foot and ankle problems

Comprehensive Care

Seattle Foot and Ankle Center provides **medical and surgical care across the spectrum of foot and ankle conditions**, including:

Pain & Sports Medicine

Heel pain • Plantar fasciitis • Achilles disorders • Stress fractures • Ankle sprains • Tendon injuries • Metatarsalgia • Morton's neuroma

Diabetic Foot & Limb Preservation

A Resource for Comprehensive Foot & Ankle Care

Whether your patient has persistent pain, a sports injury, diabetic foot complications, an ulcer, infection, deformity, or another foot or ankle concern, **we are available for comprehensive evaluation and treatment.**

Thank you for the opportunity to participate in the care of your patients.

Early podiatric evaluation can help establish the diagnosis, identify biomechanical and structural contributors, initiate appropriate treatment, and coordinate multidisciplinary care when needed.
